RAPIDMATCH™ X-5

RapidMatch™ X-5 spectrophotometer is a new approach to electronic formula retrieval. It combines the industry's only five-angle measuring device with a specially designed workflow software and easy to use operating system.

COLOUR

MAXMEYER® brand introduces *RapidMatch™ X-5* advanced colour spectrophotometer - available in **PAINTMANAGER®** program software for mixing and managing the paint operation

Built to be connected to EasyMix Connect and TOUCHMIX® computerised paint mixing system and used alongside *MaxMeyer®* brand's latest *PaintManager®* software, the new *RapidMatch™ X-5* spectrophotometer makes the colour formula selection process easier and quicker than ever before.

Practical and user-friendly, *RapidMatch™ X-5* spectrophotometer is a compact device operated via simple two-handed touch controls and is supplied with a convenient, a easy to use docking station for recharging.

RapidMatch™ X-5 spectrophotometer uses advanced optics to measure vehicle colour from five reflective angles. It then searches the industry's largest and most up-to-date formula database to find the best available match. Each search returns a series of colour variant formulas that are ranked using an innovative 'Match Rating' system with accompanying visual indicators to guide the user.

Formulas retrieved using *RapidMatch™ X-5* spectrophotometer are easily transferred to the EasyMix Connect mixing computer, which is also compatible with *PaintManager®* software.

The key product features are:

Accuracy: The only five-angle measuring device on the market able to read colours and effects with access to the industry's largest formula database. A special match rating system guides the user to the best available match.

Durable and simple to use: Delivers what you need in a hardwearing, compact and easy to use, touch control device.

Fast results: Search results are delivered quickly, enabling the user to find the best match within seconds.

Connectivity: Can be used alongside *PaintManager®* software and is easily linked to EasyMix Connect devices.

It is fully internet capable, enabling frequent system and database updates.

High Productivity and a simple process that is easy to use, this is **MaxMeyer®** brand.
